Subject: Microsoft - States continuation of case.

How can anyone of sound mind penalize a company that provides unbelievable functionality, quality, and low cost (sometimes even free !).

And it is American entrepreneurship at it's best.

This is big government (and political power/influence) at it's worst.

Sure some people want to bring Microsoft down.... the ones that want to bring themselves up into the same position.

As an average PC user..... I say.... this is just wrong !!!!!
